

AWI-Phoenix Underdrains

Do you have block underdrain issues? Please call us for the solution. We provide custom designed low profile stainless steel underdrains for your specific filter. With the lowest profile, most efficient and longest life underdrain on the market we also include a Five year 100% materials and labor guarantee.

Big Wave Water Technologies

The Tidal Wave Mixer was designed to vastly improve water quality and storage tank longevity. This powerful active water mixer is designed for use in drinking water storage tanks of multiple capacities. It features a robust stainless steel body that ensures superior resilience, and it comes with advanced safety features.

BioMag – Evoqua Water

Simple ballasted activated sludge process that will increase treatment capacity by 200% in your existing footprint and greatly improve clarifier effluent quality.

CoMag – Evoqua Water

Secondary clarifier performance to rival membrane/sand filter results in typical WWTP or Low Phos or Reuse water applications.

Davco - Evoqua Water

Municipal and Industrial water and wastewater package plants. HydroClear sand filters, cloth disc filters and Archimedes screw pumps. Field Retrofit, Rehab, and Replacement services are available.

De Nora

De Nora is among the leaders in disinfection technologies and processes for municipal and industrial applications. For safe, reliable water treatment ClorTec on-site sodium hypochlorite generators are designed for high efficiency, low lifecycle cost, durability and reliability.

Egger Pumps

Patented centrifugal pumps and control valve solutions for industrial and municipal wastewater treatment. Turo® Vortex TA Pumps and Iris® Diaphragm Control Valves.

Envirex - Evoqua Water

Game changing treatment technologies with BioMag and CoMag for activated sludge process' with clarifier operation that rivals membrane performance. RimFlo - TowBro clarifiers, Orbal Ox ditches, VLR Reactors, DAF and Chain and Flight equipment.

Essco Pumps and Controls

100% recessed impeller pumps and controls for municipal wastewater and industrial applications.

Greener Day Solutions

Our multi-plate screw press is much simpler than belt presses and centrifuges. Fully automatic operation has clog-free technology, low energy consumption, simple to operate with very low maintenance costs.

Jet Tech Systems - Evoqua Water

Sequencing batch reactor (SBR) and Continuous flow reactors (CFBR) with Jet Aeration for total life fine air diffuser performance with no annual cleaning.

John Meunier, Inc. – Veolia

Headworks grit removal, screening and washer/compactor equipment. Polymer make-up equipment, Stormwater and CSO equipment.

Lone Star Blowers

Manufacturer of geared, gearless, and multistage Turbo blowers and Control Systems located in Houston, Texas.

MFG Construction & Water Products

Wide range of fiberglass products, including troughs, weir pans, baffles, sheets, grates, covers, flumes and frames for municipal and industrial water and wastewater treatment solutions.

MIOX

State-of-the-art On-Site Hypochlorite generation systems with self-cleaning electrolytic cell feature. Transformer less designs available with 5 cell redundant design for cost reduction and footprint savings.

MSF Filter Systems, Inc.

The Multi-Stage Sand Filtration system is a complete pre-engineered package plant incorporating pre-ozonation, roughing filtration and slow sand filtration. The filter is contained in a robust marine grade aluminum container.

Netzsch

Progressive cavity and rotating positive-displacement pumps including the T2 TORNADO® rotary lobe pump and NEMO® progressing cavity pumps with grinding systems for wastewater treatment.

OTI - Olympus Technologies

Quality anaerobic digestion process equipment including steel covers, draft tube digester mixers and heat exchangers.

Vaughan Co, Inc.

Chopper Pumps, Triton Screw centrifugal pumps, and Rotamix Nozzle Digester Mixing Systems. Give us your most difficult pumping application and we'll guarantee success.

Weir Washer - Gill Trading

For automated non-cleaning systems for algae and scum problems look to WeirWasher, Eco-Blaster and our other biological control systems.

RJ ENVIRONMENTAL

RJ Environmental – Evoqua Water

RJ Environmental provides solutions for gas cleaning, full-scale chlorine release testing, emergency scrubber and odor control systems. RJ Environmental is an established product provider, global market leader, and brand for Evoqua.

WSG & Solutions

Municipal and industrial wastewater screening and grit removal equipment utilizing proven Link-Belt and Rex Technologies for CSO & Headworks products

WARREN GROUP

Tarsco Bolted Tanks

A global leader in factory applied coatings for bolted tanks. We manufacture bolted tanks for liquid and dry storage solutions in our new state-of-the-art factory.

UET Mixers

UET mixers are engineered and manufactured specifically for the demanding operating parameters associated with difficult mixing applications. UET Mixers and Agitators are ideal for a wide range of applications, where efficiency and dependability are key.
